HEADER EXCERPT FROM SOURCE DOCUMENT

Abstract

This document contains draft text changes and an electronic attachment for a second edition of Rec. ITU-T H.266.2 | ISO/IEC 23090-16. It corresponds with the changes forwarded for Consent by ITU-T SG16 in April 2024. Compared to the reference source code of the first edition of Rec. ITU-T H.266.2, this revision includes software implementation of additional SEI messages defined in Rec. ITU-T H.266 | ISO/IEC 23090-3 and in Rec. ITU-T H.274 | ISO/IEC 23002-7, as well as general software improvements such as bug fixes, run time improvements, additional encoder configuration options, and modified encoder configuration files yielding improved compression performance.

Changes to the text

Add the following paragraph at the end of clause 6:

In addition to encoding and decoding capabilities, the reference software includes capabilities for the use of supplemental enhancement information messages specified in Rec. ITU-T H.266 | ISO/IEC 23090-3 and Rec. ITU-T H.274 | ISO/IEC 23002-7, such as encoding and parsing of syntax, demonstration of functionality, or export of associated data.
