HEADER EXCERPT FROM SOURCE DOCUMENT

Abstract

This document is draft 4 of the additional conformance testing specification for VVC multilayer configurations, for testing the multilayer coding features supported in the first and second edition of VVC (Rec. ITU-T H.266 | ISO/IEC 23090-3).

Due to the size of the electronic attachments, the associated conformance test set data files are provided separately, at the following location:

ftp://ftp3.itu.int/jvet-site/bitstream_exchange/VVCMultilayer/under_test/VTM-23.0 (user id: avguest, password: Avguest201007)

For ftp access, it is suggested to use FileZilla, for which the site manager feature should be used. See Annex A of this document for FileZilla suggested configuration.

Alternatively, the same files are available by http at:
