Abstract

During previous JVET meeting, initial sequences have been selected for a possible non-CTC test case (JVET0378-v2). In this document we provide slides with thumbnails for most of these sequences to facilitate experts' selection.

Initial candidate sequence

This information was copied from BoG report on definition of non-CTC test cases (JVET-AJ0378-v2). We prepared slides for almost all of these sequences (excluding some that we could not download in time, highlighted in yellow):

For each of the categories listed at the joint meeting, the following initial sequences are recommended:

SDR RA 4K (8 in total)

Built from JVET-AK0041-v3.docx
