HEADER EXCERPT FROM SOURCE DOCUMENT

Abstract

This document contains the draft text for changes to the versatile supplemental enhancement information messages for coded video bitstreams (VSEI) standard (Rec. ITU-T H.274 | ISO/IEC 23002-7), to specify additional SEI messages, including the annotated regions SEI message, the alpha channel information SEI message, the depth representation information SEI message, the multiview acquisition information SEI message, the scalability dimension information SEI message, the extended dependent random access point (DRAP) indication SEI message, the display orientation SEI message, the colour transform information SEI message, and the multiview view position SEI message. The draft text also includes text changes for some technical corrections and editorial improvements.

Draft incorporated items:

JVET-W0077 AHG9: Comments on multiview-related SEI messages in VSEI

JVET-W0078 AHG9: Multiview view position SEI message

JVET-W0080 AHG9: Some errata and clarification items for Additional SEI messages for VSEI
